CUSTOM ENZYMES BIOREPEL

Organic formulation for pest removal in crops

BIOREPEL is an organic product with no side effects on trees, animals, or environment

For thousands of years, large locust swarms and insects have caused severe problems in agriculture. People fight against current outbreaks by using chemical pesticides, which may be harmful for humans and non-target species.

CUSTOM ENZYMES have developed a novel formulation that is effective against the desert and migratory locust species and other local insects after a single spray treatment. This herbal organic pesticide can be used as a strong repellent agent against desert and migratory locusts and a wide range of insects such as Aphids, Beetles, Grasshoppers, etc., without affecting the ecosystem.

Advantages of **BIOREPEL** include:

- Effectively controlling Migratory locusts, white flies, and insects
- Completely natural and safe
- Enhances the plant internal defence mechanism
- Repels all insects
- It is free from Toxic and solvent residue
- Completely eco - friendly for all kinds of crops

Dosage:

BIOREPEL soluble in water and can be sprayed with all types of systems in clean water at 3-6gm per litre

Packaging:

BIOREPEL is available in 25 Kg drums. The packing can also be customized as per the requirements.

Storage:

BIOREPEL should be stored in a cool, dry place. Storage in unopened containers away from direct sunlight in shaded region helps to maintain maximum activity if stored over long periods. Under these conditions, activity loss after one year should not be more than 5 – 10%. Extended storage under adverse conditions, including high temperature may require the use of higher than recommended dosages.
